SUMMARY

I am a highly motivated and enthusiastic individual with a strong foundation in web development.

My passion for continuous learning and my proactive approach to tackling challenges allow me to contribute effectively to any team.

Hands-on experience with the concepts and implementations of HTML5, CSS3, Bootstrap 4, JavaScript, TypeScript, ES6, Sass, Flex, JSON, REST APIs and Angular.

EXPERIENCE

Angular Developer   July 2023 – Present
GDigit InfoTech   Nagpur, India

PROJECTS

E-Commerce Management System

Role: Contributed to the development of an e-commerce platform.

Technologies Used: HTML, CSS, JavaScript, TypeScript, Angular 10, Angular Material, Responsive Web Design.

Key Responsibilities:

- Integrated essential features such as services, reactive forms, custom pipes, and directives to optimize the user interface (UI) and user experience (UX). Ensured efficient routing for seamless dynamic page navigation.
- Worked on an e-commerce platform using Angular, focusing on increasing sales and enhancing user experience.
- Designed responsive and user-friendly interfaces to boost customer experience and conversion rates.
- Integrated dynamic routing to facilitate seamless navigation and improve overall user engagement.
- Enhanced cost transparency by enabling price comparison and direct purchases within the platform.
- Collaborated with the team to ensure that the platform met project requirements and adhered to best practices.

SKILLS

Frontend Development:

- Languages/Frameworks: HTML5, CSS3, JavaScript, TypeScript, Angular 10, RxJS, jQuery, Bootstrap 3/4, Sass, Flex.
- Technologies: RESTful APIs, AJAX, Responsive Web Design, ES6, JSON.
- Tools & Platforms: Visual Studio Code, Agile methodology, Angular CLI.
- Version Control: Git, GitHub.
